Summary

As a highly skilled Full Stack Developer with a strong focus on back-end development, I excel in designing, developing, and managing all stages of the software development lifecycle for dynamic and scalable web applications. Proficient in HTML, CSS, PHP, JavaScript, and SQL Server, I specialize in creating robust, high-performance back-end solutions that seamlessly integrate with front-end components. With extensive experience in crafting user-centric applications, I collaborate effectively with cross-functional teams and leverage my solid project management skills to ensure timely, within-scope project delivery.

Experience

BNC Motors PVT Ltd

Software Developer — 09/2022 - 07/2025

A company focusing on automotive services and solutions

- Optimized MySQL databases with efficient queries for fast data retrieval, ensuring data integrity and security
- Integrated third-party APIs to enhance functionality and improve data flow and efficiency
- Designed responsive UIs with HTML, CSS, and AJAX for enhanced interactivity and performance
- Created custom PHP scripts and integrated them with MySQL databases to manage and retrieve data efficiently
- Developed secure and scalable backend logic to support the application's features
- Designed, developed, and maintained System Requirement Specification (SRS) reports for various business units and departments
- Troubleshot and optimized application performance, identifying and resolving issues impacting speed and user experience.
- Worked closely with cross-functional teams to understand business requirements and implement technical solutions

Ziga Info tech

Programmer Analyst — 07/2025 - Present

A software development service-based company provides custom software solutions, application development, and technical expertise to clients instead of selling ready-made products

- Develop, maintain, and manage multiple software projects across platforms using various programming languages and frameworks.
- Coordinate tasks, monitor project progress, and ensure timely delivery of high-quality software solutions.
- Design and implement **RESTful APIs** for mobile applications, conduct thorough testing, and provide them for integration with mobile.
- Integrate payment gateways (**Razor pay, Pay U, Stripe**), SMS services, and other third-party APIs.
- Deploy and manage applications on servers using **c Panel, OVI panel, and Go Daddy,** ensuring smooth operations.
- Monitor system performance, troubleshoot issues, optimize applications for reliability and speed, and maintain proper documentation.

Education

Nehru Arts & Science College

06/2019 - 04/2022

Bachelor of Science (BSC) Information Technology

Skills

PHP · Laravel · MYSQL · Node.js · RESTAPI · Codeigniter · Linux · Shell Scripting · Ajax · Bootstrap · HTML · CSS · JavaScript · Git · GitHub

Projects

DMS

Coimbatore, India

10/2022 - 12/2023

A Dealer Management System (DMS) is a software that streamlines vehicle dealership operations, including sales, inventory, customer service, and finance. It improves efficiency, reduces errors, and enhances customer experience.

ERP

Coimbatore, India

12/2023 - 03/2025

Enterprise Resource Planning (ERP) is a software system that integrates core business processes, such as finance, HR, supply chain, and sales, into a single platform. It helps organizations streamline operations, improve data accuracy, and enhance decision-making by providing real-time insights across all departments. ERP improves efficiency, reduces costs, and ensures better coordination within the company.

Projects

Cheap Storage
Chennai, India

https://cheapstorageunits.com/
12/2025 - 01/2026

Cheap Storage is a web-based storage rental platform developed using **Laravel 12**. The system allows users in the **United States and Canada** to search, compare, and rent affordable storage units online.
The platform includes a powerful **Admin Panel** for managing locations, storage units, pricing, customers, bookings, and payments.

Amibev
Chennai, India

https://sneindia.in/

This project is an e-commerce website and mobile application developed to sell various **electronic and machine spare parts** online. The platform includes a centralized **Laravel-based Admin Panel** to manage products, orders, customers, inventory, and shipping operations. REST APIs were developed to connect the backend with the website and mobile application. The system is integrated with **DTDC courier services** for order shipment and delivery tracking, enabling efficient order management and logistics.
